

Multistore Cabinet - Commercial Type Storage Cabinet

Why buy a MULTISTORE cabinet?

FILING CAPACITY AND FLOOR SPACE

Sliding door cabinets have the unique ability to store the equivalent filing of (6) traditional 4 drawer cabinets and MULTISTORE requires only 25% of the floor space by comparison. Because of the sliding door design they are ideal for placing in narrow passages where "swing door" cabinets cannot be used due to space intrusion .

VERSATILITY

MULTISTORE cabinets can be specified with a wide variety of internal fittings unlike traditional steel cabinets which can only be used for suspension filing! Do you need shelves for Lever

Arch fillies, Drawers for Stationary Video or CD drawers, Lock up compartments for valuables or confidential documents? Your Multistore can be specified with all of these features, making this an essential item of Office equipment to have in any office.

NEED EVEN MORE SPACE?

Space saving can be further improved by "mobilizing" the multistore cabinets as office space becomes limited by attaching cabinets to moving bases guided on tracks to form an integral high density bulk filing system. This is a distinct advantage by comparison with other types of office cupboards or credenzas which must be replaced to gain more space.

Multi-Drawer Filing Cabinets

- Compatible with modern office interiors
- Available in wood grain or colour finishes
- A choice of the latest filing methods
- Robust European design and function

Now you can have your own lockable cabinet with the beauty of **WOOD** finishes combined with the **STRENGTH** of internal steel structure and top quality fittings and filing methods.

Match your office furniture or décor

This exciting new multi drawer cabinet brings you the familiarity of top filing in a beautiful modern wood cabinet, now for the first time you can store your original correspondence in a high density filing cabinet that matches your office furniture.

Save space and be cost conscious

Each drawer in our new cabinet can store almost the same amount of files as a conventional steel four drawer cabinet. So you only buy 1 – ZIPPEL cabinet to replace 3 traditional types. Compare the aesthetics, the filing methods the floor space savings and compare the price!

Now you can have a choice of filing method in your ZIPPEL cabinet.

In addition to the highly recommended Desk Top Filing methods, the more traditional lateral suspension filing method can also be used in your cabinet. Suspension files A4 size can be dropped into our removable filing cradle, also for workstation use the cradle has simple adjustable stops, fitted to the rails to keep your files neat and tidy when opening and closing of the drawers even when cradle only has a few files.

ZIPFILE - New Filing Methodology

Multi Index Folders are housed in robust desk top containers made from hard wearing and attractive plastic or greyville board, easy to remove and work at your desk. No more lost Documents or unnecessary duplication.

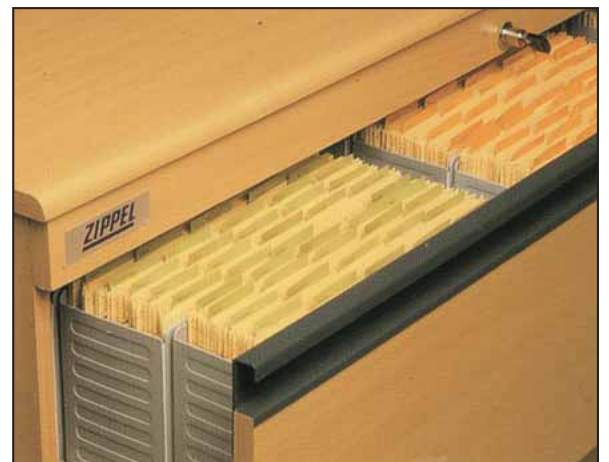

Data storage – Access and Economy of space

Economic use of space and rapid access make the **ZIPFILE** desktop container filing system the success it is. It's the science of space saving at it's most practical, since it's entire system is based on the dimensions of A4 paper and not the outdated foolscap sheet on which many older filing cabinets are based.

The system not only saves valuable space, it also makes filing foolproof and through clever design makes document retrieval easy and efficient, increasing productivity and keeping stress levels low.

ZIPFILE is based on a unique top retrieval system to cut down on waster space by 50%. It also uses an arrangement of bright coloured tabs that quickly and clearly identify data.

The **ZIPPEL** high density storage systems offers tremendous benefits in storage capacity with each drawer containing a huge 1.5 linear meters of filing, and by comparison with an old fashioned 4 drawer steel cabinet, it only uses a small percentage of space in your office!
